Hall Planning & Engineering, Inc. participated as a subconsultant to the HOK Planning Group in preparing the Big Pine Key/US1 Corridor Area Enhancement Plan. HPE work included participation in a charrette designed to review street designs, parking, and traffic circulation issues for the Big Pine Key/US1 Corridor Area.

HPE also assisted in the preparation of the final Enhancement Plan, which addressed ways transportation systems could be altered to enhance the walkability of the area. This was done by targeting pedestrian improvements that will provide pedestrian safety and comfort while facilitating efficient automobile travel.

The seven week project produced a Vision Plan, an Implementing Plan, a Regulating Plan, Building Disposition and Architectural Guidelines, and Landscape Guidelines for the corridor and its immediate surroundings.
