111 N.W. 1st Street, Suite 11-310
Miami, FL 33128-1974
(305) 375-2557

Hall Planning & Engineering, Inc. participated as a subconsultant with F. R. Aleman and Associates, Inc. in a project to assist Miami-Dade County in its efforts to define conceptual street designs for the Downtown Kendall Urban Center District. HPE reviewed and evaluated a variety of issues, including street design consistency with adopted public policy, consistency with sound urban design, and adequacy in facilitating other modes of travel in the District. The primary focus was to develop conceptual street designs compatible with walking, cycling and transit use, given the community's commitment to sustainable redevelopment in this location.
