Developed Strategic Transportation and Infrastructure Planning

CLIENT'S NAME & ADDRESS:

Robert M. McNatt
VP, Land Planning & Development
Honolua Plantation Land Company, Ltd.
Post Office Box 187
Kahului, HI 96733-6687
(808) 669-5625

Hall Planning & Engineering, Inc. participated as a subconsultant with Dover, Kohl & Partners for the Maui Land & Pineapple Company, Ltd. in its efforts to define conceptual, walkable street designs for the new Pulelehua community on West Maui. Street design was an issue, as well as traffic impacts to the surrounding communities. One of the biggest challenges was implementing smart street standards, with narrow pavement widths, smart drainage, etc. which had not been done in Maui (with the exception of the older existing communities). HPE reviewed and evaluated a variety of issues, including street design consistency and adopted public policy, traffic patterns at the airport, proposed transportation and public infrastructure improvements, and adequacy in facilitating other modes of travel in the study area. The primary focus was to develop conceptual street designs compatible with sustainable design and walkability
