Hall Planning & Engineering, Inc. participated as a subconsultant with Duany Plater-Zyberk & Company for the City of Sarasota in a charrette to update the Community Redevelopment Area (CRA) Plan for the downtown area. HPE addressed ways transportation systems serving the CRA and surrounding area could be altered to create a more walkable, liveable downtown. In doing so, HPE conducted systems-level planning for automobile, pedestrian, bicycle, and access to transit issues within the downtown.
