email: michael@mjn-enterprises.com

HPE provided post-charrette recommendations for thoroughfare design for Juniper Point, a traditional neighborhood design (TND) community south of Flagstaff, AZ.

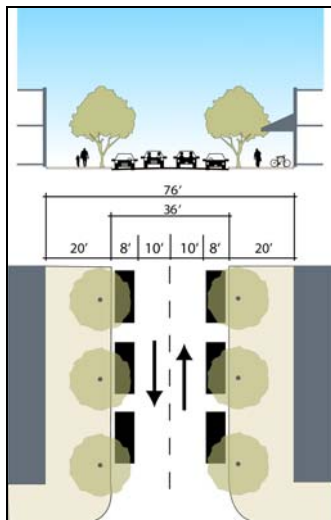

Responsibilities included evaluation of thoroughfare design and assignments, with modifications where necessary. Evaluation included preliminary AutoTurn analysis. HPE also created additional street sections to address bicycle transportation issues. HPE traveled to Flagstaff and conducted two workshops with City staff on walkable street design.

HPE conducted AutoTurn analyses of the plan

Results included the following:

- Additional thoroughfare sections to address potential access of Lone Tree Road through the site
- Presentation of thoroughfares and transportation plan to local planning commission
- Two workshops with local planning and engineering staff to discuss walkability
- Continuing involvement in the design and planning for Juniper Point

HPE provided additional street sections to support walkability in the town center
