Hall Planning & Engineering, Inc. participated as a subconsultant with Dover, Kohl & Partners in a charrette to update the Community Redevelopment Area (CRA) Plan for the downtown area. HPE addressed ways transportation systems serving the CRA and surrounding area could be altered to create a more walkable, liveable downtown. In doing so, HPE conducted systems-level planning for automobile, pedestrian, bicycle, and access to transit issues within the downtown. HPE analyzed parking supply and demand as well as parking regulations for the area. HPE provided conceptual parking and street recommendations for downtown, including a proposed multi-way boulevard.
