(228) 875-6722

Hall Planning & Engineering, Inc. participated as a subconsultant with Dover, Kohl & Partners in a charrette to provide transportation planning and design services related to the Ocean Springs Community Plans and SmartCode Calibration. The charrette and Downtown Renewal Plan were a follow-up to the Mississippi Renewal Forum.

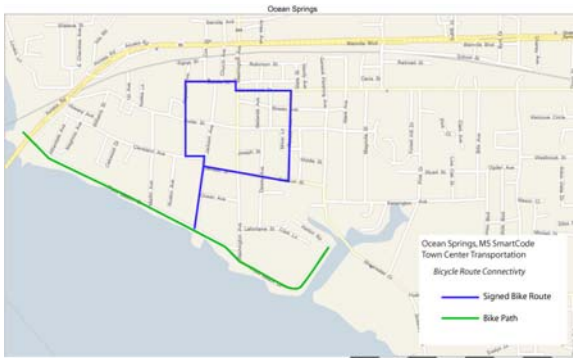

HPE was responsible for providing walkable street designs and circulation systems for Ocean Springs.

Specifically, HPE met with transportation and public works officials and documented local transportation design specifications, studied local traffic speeds and thoroughfare designs, coordinated efforts with local emergency services personnel, assisted in the design of the thoroughfare system including the creation and testing of thoroughfare street section with AutoTurn software. Additionally, HPE performed a conceptual trip generation and distribution study, allocated thoroughfare types within the various study areas and prepared all thoroughfare related SmartCode standards.

HPE worked with local officials, including fire and public works to reach consensus on walkable street design. HPE also conducted the transportation portion of the charrette presentations.
